

# Changes in delivery protocol of hazardous chemicals for the Biddeford campus

By Ronnie Souza

Please take a moment to review the UNE EHS Lab Safety Rules posting that is mounted on all laboratory doors and make sure all lab staff are familiar with the lab safety requirements. Thank you!

The poster features a blue header with the UNE EHS logo, which includes icons for a biohazard, radiation, and a chemical flask. Below the logo, the text reads "ENVIRONMENTAL, HEALTH, AND SAFETY". The main title "LAB SAFETY RULES" is in large, bold, purple letters. Below the title, the text "PLEASE READ ALL RULES BEFORE ENTERING AND LEAVING" is written in a smaller font. The first rule is "1. NO FOOD OR DRINK IN THE LAB", with a sub-bullet "• Do not chew gum in the lab." Below this, there is a section for "Closed shoes - no sandals or exposed" with a corresponding icon. The background of the poster shows laboratory glassware like beakers and flasks.

**UNE EHS**
